PODKNEE.COM

KNEE PROTECTION REDEFINED

POD® ligament knee braces set new standards in user Comfort and Confidence™, our products fit precisely, stay in position and move so naturally that it won't feel like you are wearing a knee brace.

Many of the world's leading athletes choose POD to protect their knees without compromise while thousands of amateur athletes rely on POD to stay active.

Routinely prescribed by doctors, POD knee braces are registered medical devices proven to help reduce knee injuries in sport.

“To win the Dakar, you not only need to be the best, you also need the best team and the best equipment. I won't ride without POD.”

MARC COMA | REPSOL KTM
WINNER, DAKAR RALLY 2014

HUMAN MOTION®

The intensity of modern sport places the human knee at significant risk which is why POD developed our own Synthetic Ligaments™ to reduce the strain on yours.

Only POD HUMAN MOTION provides support on demand without compromising performance.

It has never been easier to protect your knees.

SELF SERVICE

SPARE PARTS & MAINTENANCE

POD knee braces have a limited life span. Periodically, depending on usage (12 months) or after a significant impact (crash damage), some or all of the components on your brace will need to be replaced. In most cases spare parts are readily available and easily installed by you.

PROTECTION LIMITS

Participating in action sports is dangerous and may result in serious injury or death. POD knee braces cannot protect against all injuries – no knee brace can. However, independent research proves wearing a knee brace reduces the severity of knee injury.
